

Galapagos Legend ITINERARY C

4 days / 3 nights

Our Galapagos itineraries offer unforgettable experiences, with our weekly departures allowing you to experience tours including: full board, two daily guided excursions with optional activities such as snorkelling, kayaking and dinghy rides. These cruises can be combined with Diving program extensions and additional nights in Galapagos (upon request).

4 days / 3 nights

C EAST EXPEDITION

Monday - Thursday

Monday:

- ✈ Baltra Airport
- pm. North Seymour Island

Tuesday:

- am. Bartolome Island
- pm. Sullivan Bay (Santiago Island)

Wednesday:

- am. Punta Pitt & Islet Pitt (San Cristobal Island)
- pm. Cerro Brujo (San Cristobal Island)

Thursday:

- am. Cerro Colorado Tortoise Reserve 🐢 (San Cristobal Island)
- ✈ San Cristobal Airport

DAY 1 - MONDAY
am – Baltra Airport

Departure from Quito or Guayaquil to Baltra Island (2 ½-hour flight). Arriving in the Galapagos, passengers are picked up at the airport by our natural guides and taken to a ten-minute bus drive to the pier to board the Galapagos Legend

pm –North Seymour Island

This flat, uplifted, island is an important spot to see both magnificent and great frigatebird males courting the females by clicking, bill-clapping, shuddering and flapping their wings, all while showing off their grossly inflated, bright red, gular pouch. We will also likely see courting blue-footed boobies displaying their unique feet while edancing to a prospective mate. Sea lions, swallow-tailed gulls, crashing surf and distant views of the Daphne Islands top off a great visit.

Difficulty level: intermediate
Type of terrain: rocky ground
Duration: 2-hour walk / 30-minute snorkeling

DAY 2 - TUESDAY

am – Bartolome Island

Dry or wet landing. We discover a fascinating landscape formed by different volcanic parasitic cones —lava bombs, spatter, cinder cones — that resembles the moon. Going up to the summit there will be an impressive views of the surrounding islands, including the eroded tuff cone Pinnacle Rock. We also encounter marine iguanas, lava lizards, and blue-footed boobies.

Beach time is a great opportunity to do snorkeling and see the famous Galapagos Penguins, sea turtles and White-tipped Reef Sharks among a great variety of colorful fish. For many visitors, this may turn out to be the best snorkeling experience. Crystal clear water is the perfect spot to appreciate the incredible marine life it has to offer.

Due to its geographical location, the lack of vegetation is immediately noticeable however, there are pioneer plants including the endemic *Tiquilia nesiotica* and *Chamaesyce* (known as sand mat or spurge in English), lava cactus, and *Scalesia* bushes.

Difficulty level: intermediate
Type of terrain: trail made of 372 steps.
Duration: 1 ½-hour walk / 1-hour snorkeling

pm – Sullivan Bay (Santiago Island)

Wet landing. This site located at the southeastern portion of Santiago Island is of important geologic interest. It features extensive relative young pa-hoe-hoe lava flows formed during the last quarter of the 19th century. In the middle of the lava flow, older reddish-yellow-colored tuff cones appear. Mollugo plants with their yellow-to-orange whorled leaves usually grow out of the fissures. Walking on the solidified lava gives the impression of been in another planet. Tree molds are found, indicating that in that position large size plants grew in small crevices, until the lava flow of past eruptions burned down the flora of the island.

Difficulty level: difficult
Type of terrain: flat volcanic lava
Duration: 1½-hour walk / 1-hour snorkeling / beach time

DAY 3 - WEDNESDAY

am – Punta Pitt (San Cristobal Island)

Sea lions will greet us as we land on the beach and prepare for our climb to a high point on the steep eroded tuff cone. This is the only place in the islands where we will enjoy the chance to see all three of the booby species in the same place. The red-foots will be perched on the Cordia lutea and small trees, the Nazca's on the ground near the cliff edge while the blue-foots will be a little further inland. Frigatebirds will be all around and the views are breathtaking.

Difficulty level: difficult

Type of terrain: rocky

Duration: 2½-hour walk / 40-minutes snorkeling or kayaking

pm – Cerro Brujo (San Cristobal Island)

Wet landing. Cerro Brujo is an eroding tuff cone that at several locations is composed of AA lava formations and a beautiful white sandy beach, great for snorkeling and sunbathing. There is a lagoon visit where migratory bird species can be seen: Black-necked Stilts, Ruddy Turnstones, Whimbrels, other sandpiper species and White-cheeked Pintails. Cerro Brujo offers beautiful views of Kicker Rock, the southern part of San Cristobal and the adjacent coast.

Difficulty level: easy

Type of terrain: sandy

Duration: 1-hour walk / 1-hour snorkeling

DAY 4 - THURSDAY

am – Cerro Colorado Tortoise Reserve (San Cristobal Island)

Dry landing in Puerto Baquerizo Moreno. Passengers visit the San Cristobal Giant Tortoise Breeding Center to learn about the National Park's conservation programs. Enjoy a beautiful landscape on the way to the Reserve. Passengers will also have the opportunity to visit the village's port, have a drink or shop for arts and crafts and other souvenirs.

Difficulty level: intermediate

Type of Terrain: sandy

Duration: 40-minute bus drive to the Reserve / 1-hour visit

pm - San Cristobal Airport

After the visit you will go to San Cristobal Airport for their return flight to Guayaquil or Quito.
